

# Get your Brother labelers at the Beach

## Easy to use. Powerful features. P-touch EDGE® labelers.

Make the labels you need. Onsite.  
Without reading a manual.

What good is a labeler nobody knows how to use?

Don't waste your money buying labelers your crews won't use.  
Get P-touch EDGE® labelers instead.

Designed by labeling pros, these feature smart label application keys to simplify the process of making the types of labels you need most often.

So now almost anybody can make even complex, multi-line labels for datacom and electrical projects without reading a manual. Just pick the type of label you want. Enter the data into a preformatted template. Add symbols from the built-in libraries. Then print, cut, peel and apply your label.

EDGE® labelers use both TZe and HGe laminated tapes on convenient easy-swap cassettes, so you can change label colors, sizes and adhesive types in seconds. Your content is printed under a clear laminate layer, so your labels are already laminated and ready to apply when they emerge from the labeler.
